

SYMPOSIUM

CRITICAL STUDIES OF POWER, POLITICS AND GOVERNING

The purpose of this symposium is to gather academics who share a sense of urgency and responsibility to study the practices and effects of contemporary manifestations of power, politics, and governing. Together we seek to explore themes and questions related to **knowledge interventions** from anti-foundationalist perspectives. How do we contribute to relevant and impactful research in these times of turmoil? How do we develop and strengthen our conceptual and analytical repertoire? How do we protect and defend our normative and analytical foundations in academia?
